

PROPX's patented Sand Scorpion[®] technology handles wet sand from the mine to the wellsite and directly into the blender, minimizing costs, reducing emissions, and mitigating silica dust exposure.

BENEFITS

-  Wet or Dry Sand
-  Multi-modal
-  Quiet and Efficient

CONTAINERIZED WET SAND

The Leader in Wet Sand Technology

PROPX's patented Sand Scorpion® is designed specifically for wet sand:

KEY FEATURES

- 80,000 lbs. working hopper
- Delivers up to 24,000 lbs/minute
- Patented sand metering in real time
- Accepts sand from a box, frontend loader or transfer conveyor
- Simulfrac compatible
- Dry sand compatible

PATENTED TECHNOLOGY

- Increases hopper capacity
- Eliminates vibration
- Reduces head count
- Reduces mining cost by sourcing wet sand
- Reduces emissions
